Optoma HD71

Brief Introduction Beta 2.5	The Optoma model HD71 is a DLP projector with HDTV 1280 x 720 resolution and a contrast of 4000:1. The projector can be positioned very freely thanks to the horizontal and vertical keystone correction. An image width of up to 498 cm is possible. However, the image should be smaller in room light. We recommend max. 332 cm. Furthermore, the projector can play 1080P without any problems. At just 29 decibels, the device is one of the quieter projectors. It was launched on the market in 2008 and is no longer offered by the manufacturer Optoma.
