Benq GV31

Brief Introduction Beta 2.5	Brief introduction of the Benq GV31. The standard portable DLP LED projector has a HDTV 1920 x 1080 resolution and a contrast of 100000:1. It is an LED projector with 30000 hours of light life, which is over 20.5 years with a daily viewing of 4 hours. Includes an integrated media player that can be used to play files directly. An image width of up to 176 cm is possible, as the projector has 300 Ansi lumens. However, if room light is available, the image should be a maximum of 117 cm wide. The rechargeable projector is not dependent on a direct power source and can therefore be set up very quickly, freely and spontaneously. As the projector recognizes Airplay, Miracast Screen Mirroring signals, it is possible to play videos with a high resolution and surround sound directly from a smartphone, tablet, PC (Android, Windows and iOS) via WLAN. The model is also compatible with Full HD 1080P and 4K (compressed). With only 28 decibels of operating noise, the model is already very quiet compared to others.
