Sharp XV 380H

Beta 2.5

Brief Introduction	With the XV 380H, manufacturer Sharp offers an LCD projector with resolution and a contrast of 100:1. The projector can illuminate images up to 138 cm wide thanks to its 250 Ansi lumens. In room light, however, the picture width should ideally be less than 92 cm. This model is no longer offered by Sharp. It should also be noted that, unfortunately, there are no more replacement lamps for the projector, neither originals nor replicas.
