MICROTEK

MS1 Digital Projector

Powerful, portable, versatile projector

The Microtek MS1 digital projector incorporates Texas Instrument 0.55" 12° DMD chip and offers outstanding color clarity in video reproduction. With digital video connectivity, the MS1 offers optimum image quality without compromising performance. The MS1 provides a robust mechanical structure to support its 3 lbs weight, which significantly releases the burden of carrying a projector. The true SVGA (800 x 600) resolution with 1300 lumens in brightness and stunning 2000:1 contrast ratio enables detailed video presentation. Its seamless video compatibility makes MS1 versatile and suitable not only for business presentation but also for enjoying the top-notch video in high definition format (720p, 1080i).

Compact Design
- Ultra portable at only 3 pounds
- Small footprint 6" x 8.3" (15.1 x 21.0 cm)

Vibrant and Brilliant Images
- SVGA (800 x 600) native resolution with SXGA (1280 x 1024) up-scaling compatibility
- 1300 lumens with high 2000:1 contrast ratio
- 16.7 million colors

Powerful Zooms Functions
- Manual zoom lens (1.16:1)
- 16X digital zoom

Unique Features
- 2D digital keystone correction
- Picture-in-picture feature allows multiple source display
- Intelligent cooling system for prolonging lamp life

Fantastic Flexibility
- Composite, S-video and HDTV video compatibility for connecting with various video sources such as a DVD player, satellite receiver, or gaming consoles.
