Acer P6600

Brief Introduction Beta 2.5	The P6600 3D BrilliantColor DLP projector from Acer has 5000 Ansi lumens, a contrast of 20000:1 and a WUXGA 1920 x 1200 resolution. The built-in ambient light sensor detects the ambient light in the room and automatically optimizes the image. The integrated lens shift gives freedom when positioning the projector. The model offers a microphone jack plug and 10W speakers, so no additional audio equipment is required for presentations or training courses. The projector will be able to illuminate the 718 cm picture width well. Rooms with residual light can be created by the projector with a smaller image width, we recommend a maximum of 479 cm here. The HDMI MHL (Mobile High-Definition Link) port allows 1080p / 60 Hz image mirroring (screen mirroring) to be transmitted from the smartphone while it is being charged at the same time via the connection. The projector can also play 1080P and 3D without any problems.
