Appotronics AL-MU525

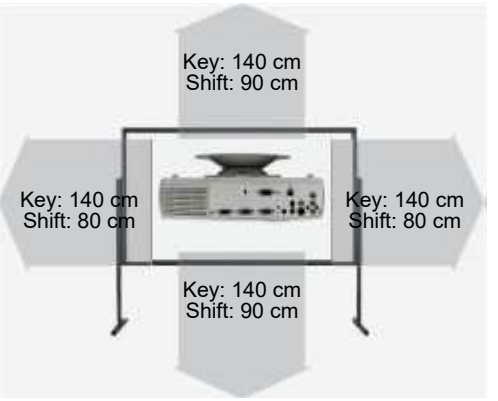

Brief Introduction Beta 2.5	With the AL-MU525, manufacturer Appotronics offers a stationary DLP laser projector with WUXGA 1920 x 1200 resolution and a contrast of 100000:1. The laser has a service life of 20000 hours, which is over 13.7 years with a daily viewing time of 4 hours. The projector also offers a lens shift function for flexible projection adjustment without loss of quality. 5200 Ansi lumens ensure that a picture width of 733 cm is also possible. The projector manages rooms with residual light with a smaller image width, we recommend a maximum of 489 cm. In the event that the image is still too small, the projector offers integrated edge blending software, with which several projectors can project a large image together. The model is also Full HD 1080P and 3D compatible, and even has the option of projecting HD 1080P Blu-rays onto the ceiling using 360° projection.
