APSE-10A

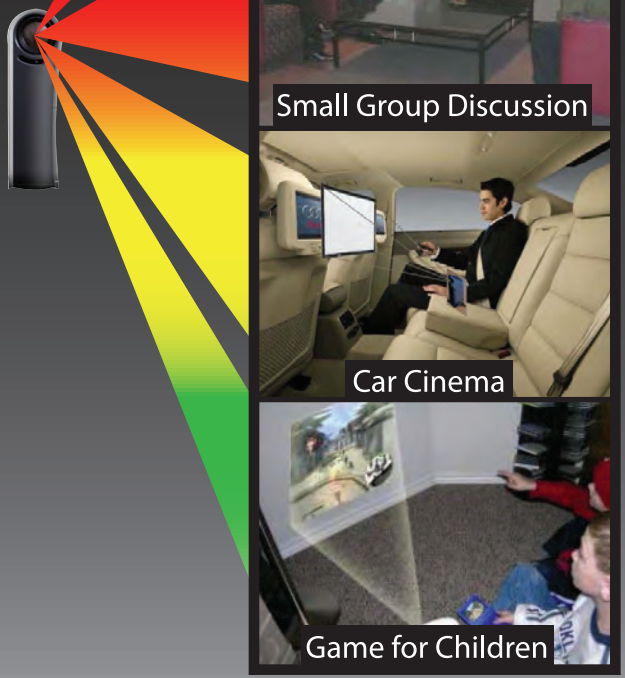

Ultra-Mobile Multi-Application Mini Projector

The Atlantis Mini Video Projector is the world's first pocket size projector with patented LED technology. It provides users with high resolution projection video up to 50 inches in screen size, all in one stylish, compact and portable unit. Despite its size, it gives clear VGA resolution pictures. It also has a built-in battery makes it perfect for presentation in remote areas. It can be used for sales presentation, group meeting, car cinema, and video game.

- World First 1P LCoS Engine
- 640p - 1080p
- 12" - 60" Screen
