Brilens LS1280

Brief Introduction Beta 2.5	The standard portable LS1280 3D laser DLP has 228 Ansi lumens, a contrast of 50000:1 and a WXGA 1280 x 800 resolution. The manufacturer Brilens specifies a service life of 50000 hours, which would be over 34.2 years with a daily viewing time of 4 hours. As Brilens specifies the brightness of the projector in lumens, we have calculated an approximate ansi-lumen value in this case. The projector can illuminate a screen width of up to 153 cm well with its 228 Ansi lumens. In room lighting, however, the picture width should ideally be less than 102 cm. The projector can also play 1080P without any problems. It was launched in 2015 and is no longer offered by the manufacturer Brilens.
