Brief Introduction Beta 2.5	With the TITAN 1080p 660 3D Ultra Contrast, manufacturer Digital Projection offers a large-format DLP projector with HDTV 1920 x 1080 resolution and a contrast of 5000:1. The built-in lens shift function provides freedom when setting up. 5000 Ansi lumens ensure that a picture width of 718 cm is also possible. The projector creates rooms with residual light with a smaller image width, we recommend a maximum of 479 cm. If the image is still too small, the integrated edge blending software can help to project a larger image with additional projectors. It is also Full HD 1080P and 3D compatible. On the market since 2013, the model is no longer offered by the manufacturer Digital Projection.
