FEATURES

The ImagePro™ 8039A, is a multimedia projector that employs LCD elements to generate vibrant full color images. The 8039A accepts signals from sources like a VCR, DVD player, or a computer such as a PC or Mac.

Potential applications are placement on conference room tables and carts, or the projector can be permanently installed in a ceiling mount or rear screen configuration.

At 7.2 lbs and being a small size, it's easy to transport with the included soft carry case. This value packed projector has a SVGA resolution with advanced electronics that permit showing XGA or VGA images. An IR remote control permits operation from convenient locations and can turn the projector completely "On" or "Off".

The ImagePro 8039A inputs are easily accessible.

Value Performers

The **ImagePro™8039A** is a value packed projector that will permit you to display images from a computer or video provided by such sources as a VCR or DVD player. It has a bright crisp image that can be easily controlled from a touch pad located on the projector or via the remote control.

The **ImagePro™8039A** has a 1.3 times manual zoom lens. This permits the projector to be placed a given distance from the screen and the image size changed by a magnification range of 1.3. For example, at a 9 foot distance to the screen, the image diagonal can be varied from 51 to 67 inches

The 8039A features all the basic functions necessary for successful meetings or use in the classroom. It can be placed on a table or stand, located in the ceiling, or used for rear screen projection. For added convenience, the projector's power can be turned "on" or "off" using the included remote control. This permits easy operation for ceiling or rear screen mounts.

With **1100 lumens** the image is sufficiently bright for most environments. The true 800 X 600 pixel SVGA, and XGA (1024X 768) compressed resolution, lets you show detailed rich color images.

For video images there is 750 lines of resolution and is HDTV compatible. Inputs are present for either composite or s-video, or monitor loop thru. Video signals of NTSC, PAL, or SECAM can be shown in 4:3 or 16:9 format. The projector's remote control can operate the computer mouse via the USB mouse port on the projector and the computer.

At 7.2 lbs. its easy to transport in the soft carrying case that is included with this projector. Also included are the cables for connection to a PC or Mac, the video cables, and an audio cable. One 3 watt speaker provides sound for your audience.
