ENUOSUMA HY300 PLUS

Brief Introduction

Beta 2.5

A brief introduction to the HY300 Plus: The ENUOSUMA LED LCD projector offers 260 ANSI lumens, a contrast ratio of 1500:1 and an HDTV resolution of 1920 x 1080. The manufacturer, ENUOSUMA, specifies a lifespan of 30,000 hours, which would equate to over 20.5 years based on four hours? viewing per day. It includes a built-in media player that allows files to be played directly. Horizontal and vertical keystone correction provides flexibility when setting up the projector. An image width of up to 164 cm is possible. However, in brightly lit rooms, the image should be set to a smaller size. We recommend a maximum of 109 cm. As the projector recognises AirPlay, Miracast and screen mirroring signals, it is possible to stream high-resolution videos with surround sound directly from a smartphone, tablet or PC (Android, Windows and iOS) via Wi-Fi. Furthermore, the Bluetooth capability is a useful addition to the projector, particularly for wireless audio transmission. The model is also compatible with Full HD 1080p and 4K (compressed). At just 25 decibels, the device is one of the quieter projectors available.
