

GINCSRI V1

GINCSRI V1

The micro-portable V1 LED LCD has 560 ANSI lumens, a contrast ratio of 12,000:1 and an HDTV 1280 x 720 resolution. Manufacturer GINCSRI states a lifespan of 30,000 hours, which, at 4 hours of viewing per day, would be over 20.5 years. The projector is equipped with an integrated media player, so playing files directly will not be a problem. A built-in horizontal and vertical keystone correction gives you freedom when setting up the projector. Since GINCSRI specifies the brightness of the projector in lumens, we have calculated an approx. Ansi lumen value in this case. The 560 ANSI lumens brightness allows for a picture width of 144 cm. In room light, the picture should be a maximum of 96 cm wide. The projector has Airplay, Miracast Screen Mirroring support, which allows for high-resolution video and surround sound to be played directly from smartphones, tablets and PCs running Android, Windows or iOS via Wi-Fi. Another extra to be mentioned is that the projector can be connected to external wireless speakers via Bluetooth. Furthermore, it is Full HD 1080P and 4K (compressed) compatible.
