IN1142 LED LightPro projector

InFocus
Collaboration That Works

Easy from the word Go

If you're going mobile, take the InFocus® LightPro™ IN1142 with you. Our smallest, lightest and most affordable LED projector also features the longest-lasting light source we've ever offered. At about the size of a paperback book and less than 1 kilogram, the IN1142 is easy to pack in your bag and carry on.

Better still, this lampless model makes maintenance easy—or nonexistent—with a light-emitting diode (LED) that lasts up to 30,000 hours. So you can go from place to place, presentation to presentation, without ever giving your projector a thought.

Why choose the IN1142?

- Incredible value
- 30,000-hour LED light source
- Only 0.8 kg
- 700 lumens of brightness
- WXGA (1280 x 800) widescreen resolution
- HDMI input with audio and MHL 1.2 compatibility
- Striking image quality and contrast
- Auto keystone correction

Connectivity
HDMI w/audio and MHL 1.2
USB Type A (for service only)
3.5mm audio out

Long-lived lampless light

How long will the light source of IN1142 LED projector really last? The LED is rated for up to 30,000 hours—so if you use it 4 hours a day, 5 days a week, 50 weeks a year, it'll last about 12 years. Until then, it's maintenance-free—not even a filter to clean or replace. And LED projectors even use less power than their conventional cousins, so you can feel more "green" too.

Striking colour and contrast

LED projectors are known for their image stability and saturated colours. But the IN1142 features a high contrast of 10,000:1, so it's even better at vividly rendering fine detail and subtle colour differences. Even ho-hum business graphics and content pop on the screen.

10,000:1

Present from laptop, tablet or smartphone

Quickly connect and present your content from your notebook, tablet or smartphone via the projector's HDMI port. Plus, the native widescreen resolution of the IN1142 means it's ready to display your HD content with incredible detail, contrast and colour depth.

Ultra-simple operation

When giving a presentation, you don't want to focus on your projector too. The IN1142 is ready when you are. You don't even have to wait for it to warm up: it's on when you flip the switch. And auto keystone correction keeps your image square and true wherever you're projecting.

Auto Keystone Correction

Specifications*
