Optoma HD73

OPTOMA HD73

Brief Introduction Beta 2.5	A brief introduction to the Optoma HD73. The home theater DLP projector has a WXGA 1280 x 768 resolution and a contrast of 4500:1 / 6000:1 in ImageAI mode. A built-in horizontal and vertical keystone correction provides freedom when positioning the projector. An image width of up to 337 cm is possible. However, the image should be smaller in room light. We recommend a maximum of 225 cm. Playing 1080P is also no problem for the projector. The operating noise of just 27 decibels makes the projection quiet. It was launched in 2007 and is no longer offered by the manufacturer Optoma.
