Optoma ML300

Brief Introduction Beta 2.5	The ML300 3D LED DLP has 300 Ansi lumens, a contrast of 2000:1 and a WXGA 1280 x 800 resolution. The manufacturer specifies an LED service life of 20000 hours, which translates to over 13.7 years at 4 hours per day. The projector is equipped with an integrated media player, so direct playback of files will not be a problem. The projector will be able to illuminate the 176 cm picture width well. However, if room lighting is available, the picture width should ideally not exceed 117 cm. 1080P playback is also no problem for the projector. It was launched in 2011 and is no longer offered by the manufacturer Optoma, but is still one of the most popular projectors.
