

Panasonic PT RZ470E/U

PANASONIC PT RZ470E/U

The stationary PT RZ470E/U 3D laser DLP projector from Panasonic has 3000 Ansi lumens, a contrast of 20000:1 and an HDTV 1920 x 1080 resolution. Thanks to the laser technology, the projector has a light life of up to 20000 hours, which is over 13.7 years with a daily viewing time of 4 hours. With the lens shift function, the projector can be positioned very freely. The projector can illuminate an image width of up to 556 cm with its 3000 Ansi lumens. In room lighting, however, the picture width should ideally be less than 371 cm. If the image is still too small, the integrated edge blending software can help to project a large image with additional projectors. Furthermore, the projector can play 1080P without any problems and can even project Blu-rays onto the ceiling thanks to 360° projection. The model was built by Panasonic in 2012 and is no longer current.
