

BOXLIGHT Announces Its New, Ultra-Bright MP-86i Projector

Portable, full-featured unit performs brilliantly in fully-lit conference rooms and on-the-road

Poulsbo, WA - BOXLIGHT is pleased to introduce its new MP-86i projector: the brightest, most full-featured SVGA projector available in the 13 lb. and under category.

BOXLIGHT's new MP-86i multimedia, polysilicon projector tips the scales at only 13 lbs. yet boasts a powerful blast of 1700 ANSI lumens of brightness. With this kind of power there's no need to pull the shades or dim the lights. The MP-86i can conquer the most challenging lighting environments – from sun-lit meeting rooms to overhead fixtures.

Outstanding image clarity is assured with true 800 x 600 (SVGA) resolution and excellent 1024 x 768 (XGA) compression, eliminating the need to adjust the computer's resolution to match the projector's.

In addition, several standard features of the MP-86i projector help speakers add an extra dimension to their presentations. The MP-86i's innovative Picture in Picture feature allows presenters to display computer and video images at the same time. For example, during a PowerPoint™ presentation a presenter can simultaneously show a video clip on a small on-screen window without disturbing the main presentation on the big screen. This convenient feature eliminates the need to embed video clips in the PowerPoint slide.

A peripheral system such as a VCR or DVD player, as well as two computers, can be connected to the MP-86i to set the stage for a true multimedia event.

The convenient remote control liberates speakers to roam the stage or interact with the audience. With the remote in hand, presenters can activate the digital zoom imaging or the built-in laser pointer to spotlight and digitally enhance an area of the screen from anywhere in the room.

Moreover, the unit's power zoom/focus can be used to get just the right-sized image to fill up the screen and the digital keystone adjustment squares-up an image at the touch of a button.

BOXLIGHT's MP-86i projector is the brightest SVGA unit on today's market in the 13 lbs. and under category. With 1700 ANSI lumens and a range of outstanding features such as Picture in Picture the MP-86i is an excellent choice for presenters who demand power and performance in a unit that's easy to carry.

BOXLIGHT sells display and projection technology under its own brand of BOXLIGHT Certified™ equipment, as well as the most innovative, refined products from manufacturers such as InFocus, Hitachi, Sony, Mitsubishi and Epson.

The company also offers professional services to enhance every aspect of presentations from content development to the finishing touches. BOXLIGHT's Creative Services division can assist presenters in polishing existing presentations, animating company logos and developing full-blown professional presentations from scratch. BOXLIGHT's training division, BOXLIGHT Academy, offers instruction in subjects such as making PowerPoint™ presentations and enlivening technical speaking engagements.

BOXLIGHT is the world's leading distributor of projection equipment, services and training. With humble origins in a basement in 1986, BOXLIGHT operations have expanded to encompass sales in the United States, Canada and worldwide. The company has been listed as one of Inc. magazine's "Fastest Growing Private Companies in America" for five consecutive years, and one of Deloitte & Touche's 500 fastest growing technology companies in the United States.
