Roly RL-M85U

Brief Introduction Beta 2.5	The Roly RL-M85U stationary laser LCD projector has 8500 Ansi-Lumen, a contrast of 5000000:1 and a WUXGA 1920 x 1200 resolution. It is a laser projector with a light lifespan of 20000 hours, which would be the equivalent of 13.7 years at 4 hours a day. Since the projector has horizontal and vertical keystone correction, it can be set up with plenty of space in the room. An image width of up to 937 cm is possible. If the image width is smaller (we recommend max. 625 cm), rooms with low light are no problem. Furthermore, the projector can play 1080P without any problems.
