SONY

MODEL VPL-CS7

Mobile and Bright SVGA Projector

1800 ANSI lumen

Mobile and bright enough for virtually any classroom or meeting room, the VPL-CS7 is an ideal projector for education and business use.

The Sony VPL-CS7 is a truly mobile projector with features that save time before and after a lesson or presentation. Sony's Intelligent Auto Set-up means that the projector is ready to use at the press of a button and thanks to the Off & Go function the projector can be unplugged and taken away without waiting for the lamp to cool down. This projector is also equipped with "Monitor Out", which allows users to view the projected image on an additional screen.

Key Features

Monitor Out

The projector can display the image simultaneously on a large screen and on an additional monitor (via a 15 pin D-sub connection), so that the user can face the audience and still see the information being shown.

Additional Features

Off & Go Function

The fan continues to cool the projector after the power supply is removed, enabling users to unplug the projector immediately after use, without damaging the lamp. (Other projectors need to be cooled and remain connected to the power supply after use.)

Intelligent Auto Set-up

Press the 'on' button and the projector will complete the following steps automatically, ensuring ease of operation:

1 Lens protector opens automatically (which also avoids loss of the lens cap)
2 Projector tilts to previously used angle
3 Auto keystone correction is completed
4 Auto input search occurs
5 Smart Auto Pixel Alignment (APA) is completed.

Control Panel Lock

This function locks the controls on the top and side of the projector, to prevent unauthorised or unintentional use of the controls. Functionality can be switched 'on' or 'off'.

Password Protection

When this function is activated a password is required to use the projector (if the password is lost, Sony is able to retrieve it).
