Strong Estelle One

STRONG ESTELLE ONE

Brief Introduction Beta 2.5	The Estelle One LED LCD portable gaming projector has 200 ANSI lumens and an HDTV resolution of 1920 x 1080. Thanks to the LEDs, the projector has a specified lamp life of 30,000 hours, which equates to over 20.5 years at 4 hours? use per day. The built-in ambient light sensor (Ambient Light Sensor) detects the ambient light in the room and automatically optimises the image. Horizontal and vertical keystone correction ensures that setting up the image is child?s play. Thanks to its 200 ANSI lumens, the projector can effectively illuminate an image width of up to 321 cm. However, in well-lit rooms, the image width should ideally be less than 214 cm. Thanks to the built-in 4000mAh battery (3-hour runtime), no external power supply is required, allowing the projector to be set up quickly and flexibly. The integrated Google Assistant in the projector opens up many practical possibilities, such as voice-controlled navigation, smart home control and listening to music. As the projector recognises AirPlay and Miracast screen mirroring signals, it is possible to stream high-resolution videos with surround sound directly via Wi-Fi from a smartphone, tablet, PC (Android, Windows and iOS) directly via Wi-Fi in high resolution with surround sound. Another bonus worth mentioning is that the projector?s Bluetooth function allows it to be connected to external wireless speakers. The projector also handles 1080p and 4K (compressed) video signals with ease.
