

XGIMI V10

XGIMI V10

Brief Introduction

Beta 2.5

The high-end V10 Laser DLP home theater projector from XGIMI has 5,400 ANSI lumen, a contrast ratio of 5,000,000:1, and a UHD (4K2K) resolution of 3,840 x 2,160. Thanks to its laser technology, the projector has a rated lamp life of 20,000 hours, which would equate to over 13.7 years based on 4 hours of daily use. It includes a lens shift function, which provides flexibility during installation. Since XGIMI specifies the projector's brightness in lumens, we have calculated an approximate ANSI lumen value in this case. An image width of up to 640 cm is possible, as the projector has 5,400 ANSI lumens. In rooms with ambient light, the projector can achieve this with a narrower image width, we would recommend a maximum of 427 cm. The model supports AirPlay and Miracast screen mirroring, so it's possible to play high-resolution videos with surround sound directly over Wi-Fi from a smartphone, tablet, or PC (Android, Windows, and iOS) via Wi-Fi. In addition, the Bluetooth capability is a useful feature for the projector, especially for wireless audio transmission. The model is also compatible with Full HD 1080p and 4K. Even ceiling projection is possible thanks to the 360° projection capability.
